COMPANY PROFILE

LOVE FOR WOOD, FOR ITS WARMTH, ITS ELEGANCE

All began in 1968 when Mr Ruggero Leardini, after studying in a carpentry school, started a craftsman laboratory with his wife Mrs Luisa Zamboni.

Together they have been able to manage it and have been an example for their two sons Andrea and Sebastiano who followed them with their great ambitions. Both of them studied Economy and Trade, and once graduated at the University of Verona, they decided to set up the company “ STELLA DEL MOBILE ” in 1998 which moved into the new factory in 2004. The company has quickly become a reference point in Italy and abroad for its elegant offer and its wide range of furniture.

The different collections are composed of Renaissance style sideboards, glamour compositions, all made with high-quality standards of production from the raw materials to the finishes.

The company always reaches to bring forward the fashion and the public inquiries.

MISSION

TRADITION, INNOVATION, ENVIRONMENT

Tradition is the first distinctive sign of our production, a basic benchmark for searching new shapes and for our experience as manufacturers.

After more than thirty years of experience in wood carving, we could dig out the secrets this wonderful material hides and we discovered the fascination, the warmth and the sense of elegance that the wood can transmit.

The continuous technological investments helped us to be more precise, in a technical way and to limit the wastes, the starting point of the politics of our factory “More respect for the environment”.

Our furniture is made in compliance with the best manufacturing techniques of Art furniture and are produced according to the rules of the old manufacture, as for instance the assembling through mortise and tenons joint in the drawers. Varnishing is completely hand-made with water dye and shellac varnish, in order to obtain a better gloss and transparency besides the softness to the touch. Lastly our furniture is finished with beeswax to protect and preserve it. All manufacturing techniques and different products we use are conceived and chosen considering most respect for the environment.

STRUCTURE

TECHNOLOGY AND TRADITION

Stella del mobile is located in 2 different places:

1 – in the first one we build furniture; the factory is about 4.000 square meters and inside we have about 200 machineries.

STRUCTURE

TECHNOLOGY AND TRADITION

2 – in the second one we finish the furniture and we have located the new show room; this factory is about 6.000 square meters.

OUR NEW SHOW ROOM

TRADITION, INNOVATION, ENVIRONMENT

We opened the new Stella del Mobile's show-room in the new factory not long ago, where it is possible to see all our production fitted in 24 different rooms, from a classical atmosphere to a more contemporaneous one. This choice has been suggested by the different markets we work with and by the heterogeneity of the way of living and feeling the own house ; all the atmospheres have been decorated in an unique way.
